

QolorFLEX® UV LED Tape

2835-24-UV395-60-5-20-1

QolorFLEX UV LED Tape was designed to accentuate the fluorescence of surrounding objects or paint, providing a “glow in the dark” effect. With a wavelength of 395 nm just outside the visible spectrum, **QolorFLEX UV LED Tape** works similarly to a black light but in a professional QolorFLEX LED strip. It is ideal for installations such as from theme park rides to mood lighting to Halloween events. Like all 40+ high quality types of QolorFLEX LED Tape, **QolorFLEX UV LED Tape** is sold in 5m reels and includes six-inch long pigtailed on both ends for easy connections to QolorFLEX Dimmers for flicker-free dimming.

SPECIFICATIONS:

Physical		
Length	5m	(16.404 ft)
Width	10mm	(0.394 in)
Cutting Increment	100mm	(3.937 in)
LED Spacing	16.7mm	(0.657 in)
Backing Color	White	
Connector Type	200mm long (7.874 in) flat cable on both ends, stripped 10mm and tinned	

Output	
Color(s)	UV
Wavelength	395 nm
Beam Angle	120°
Color Rendering Index (CRI)	≥ 95

Electrical	
Operating Voltage	24VDC
Current	1500 mA/5m
Power Consumption	36 w/5m (2.19 w/ft)
Density	60 LEDs/m
LED Chip Size	2835

Product Information	
Use Environment	Indoor
Dimmable	Fully Dimmable
Average Life	50,000 hours
Warranty	Two years
IP Rating	IP20
Compliance	ETL, CE, RoHS
