

Configuration:

ACWP50 Adhesive Warning Tape 164 ft. (50 m)

Product Overview:

Ampetronic supply a special high quality adhesive tape for affixing copper tape to floor surfaces. The tape has a printed warning message and symbols designed to alert others to its presence, purpose and importance. The warning message printed on the tape is especially pertinent if visible before a floor covering is fitted. To alert inform carpet fitters of its location so that can avoid cutting the cables for example. The tape is supplied in 164 ft. (50 m) lengths.

Highlights:

- Simplifies the installation of loops under floor coverings such as carpet, vinyl, laminate and wood
- Designed to secure the flat insulated copper cable to the floor and to clearly mark the cable installed in that location
- Printed warning text and hearing impaired logos help prevent damage
- Supplied in 164 ft. (50 m) lengths

Includes:

One (1) ACWP50 Adhesive Warning Tape 164 ft. (50 m)
