ADX20i

CONDENSER MICROPHONE

User Guide

PRODUCT DESCRIPTION

The ADX20i was designed for use in both live sound reinforcement and recording of acoustic instruments. A bell mount clamp is supplied with the microphone to attach it to most bells on brass and woodwind instruments. To attach the microphone to the bell mount. (See Figure A)

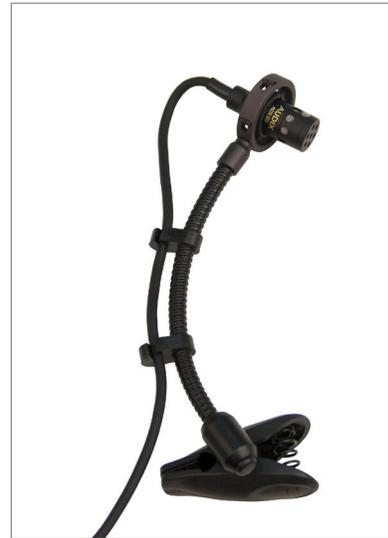

Fig. A

1. Begin by inserting the ADX20i into the shockmount located on the top of the bell mount. Slowly twist the microphone back and forth to slide it into the mount.

NOTE: Make sure the holes on the side of the capsule are NOT covered by the shockmount. (See Figure B)

2. Attach the cable to the back of the gooseneck using the supplied strain relief grommets. Leave slack in the cable to prevent stress on the connection. (See Figure C)
