

# cool cable™

## PowerCON® TRUE1 Compatible + DMX Combo Cables

### Replace Individual Power/DMX Cables

Cool Cable™ DMXPCT cables can replace any set of individual power and DMX extensions with a single neatly wrapped cable. They come in various lengths, with 3-pin or 5-pin XLR plugs, and can be used to link the power and data of any equipment with DMX and powerCON® TRUE1 compatible connections.

### Reliable Data Transfer

These cables are perfect for linking up all of your outdoor lighting fixtures. The DMX cable is built to meet USITT standards for DMX512 cables - 120 ohms, low capacitance, and double (foil and braid) shield. Finally, both power and DMX cables are encased together in a highly flexible outer jacket with heat shrink.

### Warranty

- Limited lifetime warranty

### Main Features

#### DMX Signal/Data

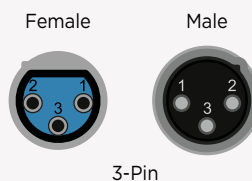

- 3-pin or 5-pin, IP65 rated
- Double shield (foil and braid)
- 120 ohm impedance
- Low capacitance

#### Power Cable

- Heavy-Duty 14AWG
- powerCON® TRUE1 compatible connectors
- 3 conductor, heavy duty black cord
- Maximum amperage: 15 amps
- Easy and reliable twist lock system
- UL recognized components

#### 3-pin DMX + Power Cables

Model:	Length (FT):	Description:
DMXPCT-3	3	powerCON® TRUE1 compatible in/out + 3-pin DMX in/out
DMXPCT-6	6	powerCON® TRUE1 compatible in/out + 3-pin DMX in/out
DMXPCT-10	10	powerCON® TRUE1 compatible in/out + 3-pin DMX in/out
DMXPCT-25	25	powerCON® TRUE1 compatible in/out + 3-pin DMX in/out
DMXPCT-50	50	powerCON® TRUE1 compatible in/out + 3-pin DMX in/out

#### 5-pin DMX + Power Cables

Model:	Length (FT):	Description:
DMX5PCT-3	3	powerCON® TRUE1 compatible in/out + 5-pin DMX in/out
DMX5PCT-6	6	powerCON® TRUE1 compatible in/out + 5-pin DMX in/out
DMX5PCT-10	10	powerCON® TRUE1 compatible in/out + 5-pin DMX in/out
