

Configuration:

- GG00001 Hearing Loop Sign (Large)
- GG00002 Hearing Loop Sign (Small)

Product Overview:

Hearing Loops provide an important service for hearing aid users and others with challenging levels of hearing loss in many environments and applications, but they're completely pointless if no one knows the facility is available to them.

Large logo (SKU: GG00001)

Small logo (SKU: GG00002)

Available in small and large.

Dimensions (WxH):

Small: 105 x 118mm Large: 210 x 235mm

It's imperative that the necessary Hearing loop signs are displayed, as the systems are, in effect, invisible and inaudible to potential users - who simply wouldn't know to switch their hearing aid to the correct setting, or ask for a receiver, without being informed to do so.

The internationally recognised Hearing Loop sign consists of an ear graphic with a T and brief instructions for those unfamiliar with the technology.

Highlights:

Two different sizes of Hearing loop signs are available.

Large logo (Product code: GG00001#) - double sided, printed in standard blue colour, on white rigid sheet, 0.62mm thick.

Small logo (Product code: GG00002#) - double sided, printed on 0.25mm plastic sheet, with one side coated with a fully transparent adhesive for fitting to glass panels.

Dimensions (WxH):

- Small: 105 x 118mm
- Large: 210 x 235mm

Includes:

Large logo (SKU: GG00001) - double sided, printed in standard blue colour, on white rigid sheet, 0.62mm thick. Or Small logo (SKU: GG00002) - double sided, printed on 0.25mm plastic sheet, with one side coated with a fully transparent adhesive for fitting to glass panels.
