

IR-842R-AM

EXTERNAL INFRARED RECEIVER

The IR-842R is an external infrared receiver for the IR-842 system, developed to enhance the reception of the portable infrared soundfield system

Key features

Specifications

Infrared Detector

Wavelength	850 nm
Carrier Frequency	Teacher: (CH-A): 3.100 MHz Student: (CH-B): 3.350 MHz
Communication Area	Approx. 7 m (22.97 ft) in radius from the point underneath the unit (Ceiling height: 2.5 m - 3.0 m (8.2 - 9.84 ft), in a space without any obstacle and visible between the infrared microphone and receiver)
Connection Terminal	RJ-45
Operating Temperature	0°C to +40°C (32°F to 104°F)
Operating Humidity	Under 90% RH (no condensation)
Finish	Enclosure: ABS, black
Dimensions	110.4 x 110.4 x 49 mm
Weight	138 g
