LINE ARRAY SERIES LA4PM

The LA4PM is an unpowered/Passive permanent mount Line Array speaker designed for 70 volt systems. It features an internal 100 watt, 70 volt autoformer and a screw terminal block on the back panel for selecting the proper wattage tap. Simply connect the common (-) line from the amplifier to the screw terminal labeled "COM". Then connect the positive (+) line from the amplifier to the screw terminal corresponding to the desired wattage tap. A 16 ohm tap is also provided to bypass the autoformer and connect directly to the speakers if desired. The LA4PM may be mounted to nearly any surface using an optional bracket or "flown" from cables using the various threaded T-nut locations on the cabinet.
