

# MB-80 12 V Li-ion Battery Case

## Features

- MB-80 battery case is designed to hold four 32700 Li-ion batteries and can replace the existing MB-70 lead-acid battery inside the MIPRO wireless PA systems.
- BMS smart battery management circuit design provides safe charging and longer life cycles.
- Standard output voltage 12.8 V; maximum continuous output current up to 8 A.
- Shorts-circuit protection ensures the safe operation of batteries.
- Each battery has protection circuits for overcharge voltage at 3.9 V and over-discharging voltage at 2.0 V.
- A smart management circuit ensures balanced charging and discharging states.
- Flame retardant rating: V0.
