

MPB-24 2.4 GHz Antenna Booster

Features

- It is optimized in the ISM 2.4 GHz band to amplify the antenna signal, offering 20 dB gain to compensate for signal loss over long antenna cables and to increase the reception range and signal stability.
- The antenna booster can be powered by the bias of the receiver's antenna connector or by an external power supply, allowing longer antenna cables can be connected with more boosters.
- With an aluminum casing, it features superb heat dissipation and is waterproof.

Specifications

Frequency Band	ISM 2.4 GHz
Gain	Fixed, approx. 20 dB
Input Connector	1 × TNC
Output Connector	1 × TNC
System Impedance	50 Ω
Input Power	DC 10 – 24 V
Regulated Power Output	Equals to the bias
Dimensions	41 × 80 × 24 mm (W × H × D)
Weight	Approx. 260 g
