

POWERFUL MAGNET KITS

FOR RIGGING LED TUBE LIGHTS

MAGFORCE magnets are the perfect accessory for your LED tube lights; they are excellent for mounting lights in unconventional areas and achieving a clean and finished look. Our magnets are coded in rubber to prevent you from scratching the surface you mount to, and our powerful magnets allow for mounting to various surfaces like walls, ceilings, and glass using the included mag plates. You can also mount directly to any metal surface or metal reinforcements hidden within walls or the surrounding environment.

MOUNT TO VARIOUS SURFACES

WALLS	CEILING	GLASS	METAL SURFACE
