Monstro-Couplers come in two versions, threaded (left) or clearance CS hole (right). These couplers also available in mill or black finish.

There is a difference in pipe size (OD is larger than specified size) and tube size (OD is same as specified size). Sometimes these sizes overlap enough for a coupler to do (1) pipe and (1) tube size as indicated in the chart above.

The "min" and "max" internal diameter (I.D. of the clamp is designed to fit pipe and tube, based on industry standard tolerances of manufactured pipe and tube.
