

ALTMAN LIGHTING Nimbus Series LED VIDEO CONFERENCE LIGHTING.

The Nimbus tunable white LED video conference lighting is the perfect solution for your video lighting needs. The Nimbus series is the perfect combination of LED battery and USB powered fill and ring lights to suit your video conferencing and home or office studio lighting requirements.

The Nimbus Side Kick is a high output 180 LED tunable white (3000K to 6000K) non-glare soft light that is fully dimmable and battery/USB powered. The compact design of this luminaire (no larger than a cell phone) allows for easy mounting, transportability, and discrete placement with in your video environment.

The Nimbus Halo is a 6" ring soft light that is USB powered LED tunable white fill light. Halo can be powered from either the Sidekick (sold separately) or any USB device. Halo can be either stand alone or work in unison with the Side Kick to help fully model the lighting area.
