GENERAL INFORMATION

No more wasting resources lighting an empty room. Buildings can waste electricity as a result of lights being left on in an unoccupied room. ETC's Unison Paradigm Occupancy/Vacancy Sensors are a convenient and easy solution for your facility to eliminate that wasted energy, by automatically turning off lighting loads when a room is empty. The low-profile, sleek sensors can be installed anywhere in your facility to provide uninterrupted, 24/7/365 operation, without affecting the look and beauty of their surroundings.
