

Networked Audio Solutions

 Dante™

Introducing the **NEW** DD Series wall-mounted products for interfacing microphone and line-level audio to a Dante network. High resolution Analog ↔ Digital conversion combined with RDL's legendary analog filtering provides studio quality sound.

Unique features include stainless steel chassis, metal XLR jacks, heavy-duty mini jacks, superior heat dissipation, rear-panel outputs to feed compatible RDL jack plates, available custom labeling and recessed RJ45 with top cable entry for easy installation.
