

VERISMO™

FRESNEL RGBALC

Full Color LED Fresnel + Zoom

RGBALC + HSIC Color Mixing

Verismo™ Fresnel RGBALC is ideal for a variety of applications including theater, video, and production studios thanks to its high output 300W RGBALC LED module. Its advanced RGBALC color mixing system offers many control options including 16-bit fine dimming for each individual RGBALC color, 2x dedicated HSIC (hue, saturation, intensity, color temperature) control modes, and direct access to 2200K-10000K white CCT presets.

Loaded with Features

The 200mm (8-inch) Fresnel lens produces a bright circular light with a soft edge, and the beam angle can be adjusted anywhere from 18°-65° using its DMX controllable motorized zoom. User-selectable dimming curves, dimming speed, and frequency mode settings are accessible from its easy-to-use 4-button OLED control menu, and this fixture offers a standard sized 10-inch single slot frame/barndoor holder (accessories not included).

Luminous Intensity

Lux/Meter	2.5 Meter	5 Meter
18° (narrow beam)	7,031 Lux	2,464 Lux
