

The Light Source XL Mega-Truss Dolly

The Mega-Truss Dolly XL now has the most requested upgrade-- four wheels and a wider base. The four castors provide extra stability when moving the truss dolly over obstructions and allows for moving and unloading truss without strapping for each move.

Convenient handle cutouts on both sides of the dolly allow for carrying the dollies after unloading. The Mega-Truss Dolly XL has the same e-track tie downs to hold the truss as the traditional Mega-Truss Dollies.

The Mega-Truss Dolly XL is laser cut and formed from 5052-T6 aluminum material. Castor capacity is 3,200 lbs.
