

FOLLOWBOT 600W LED CMYK

Product Description:

The FOLLOWBOT 600W LED CMYK is one of the first 600W LED followspots with a CMYK color-mixing system. By blending cyan, magenta, and yellow, it offers hundreds of color options. The 'K' refers to adjustable color temperature, with a variable CCT wheel allowing precise adjustment from 7600K to 3200K. This removes the need for external filters and maintains the natural appearance of performers. The 600W LED engine features a CRI above 90 for excellent color rendering in open white. All functions can be managed via a rail-mounted controller with presets or directly from a DMX desk. While movement is manual, all other features are accessible from the main DMX desk. Key features include a five-color wheel, electronic zoom (6° to 12°), focus, iris, and electronic dimmer, all compatible with most DMX controllers.

Key Features:

- CMY Color-Mixing System
- Variable CCT
- Panel and DMX Control
- Short to medium through application
- >90 CRI
