

Six Angle building cube module for Astera Helios, Titan and Hyperion. Aluminium Silver anodized with (6x) M5 threads and (24x) M4 threads. Wgt: gr. 90, oz. 3,2.

The Exo Cube is a six angle module to create special lighting projects, but also to create special multilayer set design solutions, like walls of light and three-dimensional projects.

Works in conjunction with the Exo Link (and Dual Action for the fourth angle) but can be used also as a building module in conjunction with the other elements of the Exo Skeleton series.

SAFETY: The Exo Skeleton system has been designed to expand the creative potential with Astera Helios, Titan and Hyperion LED tubes for professional users in the world of entertainment, television and cinematography. Astera LEDs were not originally designed for heavy use with complex modularity and it is recommended to carefully evaluate safety in the construction of complex and sophisticated solutions that require professional support and anchoring systems.

WARNING: Before using the Exo Skeleton system with the Astera LED tubes, make sure that the two screws are well tightened with a Phillips screwdriver. This is important for effective and safe use, avoiding wear of the parts in contact.

Astera LEDs were not originally designed for heavy use with complex modularity and it is recommended to carefully evaluate safety in the construction of complex and sophisticated solutions that require professional support and anchoring systems.

THE FUTURE NEWSROOM?

A new idea for a television newsroom, or a new way of thinking about a portable entertainment venue? Exo Skeleton is the next art for set design and lighting design.
