infinipix™ ARCADE®

Multi-Beam + Eye-Candy FX

Step Up Your Game

Infinipix™ Arcade isn't just another lighting fixture... it's a game changer. With 8x 20W white LEDs and 8x sections of SMD 5050 RGBW LEDs, it combines sharp 3° beams with dazzling colored eye-candy. Its beams and background colors are independently dimmable with separate strobe, chase, and trail effects, and it can be operated in auto, M/S, or be controlled via 11, 20, 21, or 41 DMX channels with pixel mapping capabilities.

Level Up!

In addition to its many spectacular effects, it offers electronic frost on the front lens. When applied, this cuts the beams at the surface, turning them into 8 perfectly round white dots, while softly diffusing the RGBW background colors. Multiple fixtures can be perfectly aligned with its included hardware, and it also comes with powerCON TRUE1-compatible power in/out, 5-pin DMX in/out, and Omega brackets for versatile mounting.
