LUX CAPACITOR 2

High-Output Vintage-Style Blinder with RGB Aura Effects

Vintage White + RGB Effects

The Lux Capacitor™ 2 is a retro-inspired blinder and RGB effect fixture that delivers intense 2000K vintage-style warm white (amber) light from its 3 x 60W LEDs. It also features 48 x 3W RGB LEDs for vibrant background colors and effects. A reflective aluminum inner housing enhances brightness and produces an aura of RGB color behind the warm white output.

Loaded with Features

The fixture offers 6/8/10-channel DMX modes with separate RGB color mixing and warm white control, and it includes 7 static colors, 10 built-in programs with fades and chases, and 2 sound-active modes. Its durable metal housing, single mounting bracket, 4-button control menu, 5-pin DMX in/out, and PowerCON® TRUE1-compatible in/out connectors make setup quick and reliable.

Warranty

And of course, the Lux Capacitor 2™ is backed by Blizzard's 2-year limited warranty.
