RAVEN
POE TWO-UNIVERSE ARTNET/SACN NODE

Two-Universe Art-Net/sACN Node with PoE & Bluetooth

Prepare to Soar

The Raven is built around flexibility. Connect over RJ45 ethernet for the stability of a hardwired setup, or pair via Bluetooth for wireless configuration and control from anywhere in the room. With a PoE-compatible router or injector, a single ethernet cable handles both data and power. No PoE? The included USB-C cable has you covered.

Wired or Wireless

It is especially well suited for permanent installations, where it pairs hardwired reliability with the convenience of walking the floor during setup. Assign addresses, set channel modes, and test fixtures over RDM without ever touching a console. Users of Blizzard's At Full app can pair the Raven from the Configure page and you're ready to go.

Warranty

And of course, the Raven™ is backed by Blizzard's 2-year extendable warranty.

Create + Control + Test via Our Official Companion App @Full.
