

100W LED professional moving head beam fixture with a variety of beam shaping options.

Suitable for installation in nightclubs and other entertainment venues, as well as for mobile use by production companies and entertainers, Eliminator Lighting's Stryker Beam is a potent moving head beam fixture. It focuses the light from a powerful 100W LED light engine through high quality optics to create a razor-sharp output that will punch through background lighting to create piercing mid-air effects.

The Stryker Beam offers fast, precise movement as well as a diverse collection of beam-shaping tools, which provide lighting designers lots of creative potential. A dedicated Gobo wheel features 11 die-cut metal shapes (plus open), which include two beam reducer options alongside a carefully curated selection of patterns designed for generating aerial effects. A motorized focus function allows GOBOS to be kept sharp, while a separate color wheel offers 13 vibrant options (plus white). A built-in frost filter allows the fixture to morph from a hard-edge beam to a soft wash of light. Finally, two circular rotating prisms are provided, 8-facet and 16-facet, which can be used to split up the narrow beam into a wider break-apart effect. Both prisms may be layered for an animated effect. When a 6-color flag is added to the beam path, a new multi-color effect is produced.

For a fixture of its class, the Stryker Beam is a compact and lightweight moving head, which is easily portable. It features a large full color display screen, providing access to an intuitive menu-driven interface for DMX addressing and customization of the unit's operating parameters. It features locking power input and output sockets, to allow multiple fixtures to daisy chain from a single outlet, together with both 3-pin and 5-pin DMX sockets for easy integration into any existing DMX system.

LIGHT SOURCE:

- 100W LED Engine
- 6-Degree Beam Angle

FEATURES:

- Full color function display with 4 buttons
- Fast, precise, pan & tilt movements
- Primary / Secondary stand-alone mode
- Motorized Focus
- Frost Filter (50-Degree Wash Effect)

COLOR WHEEL:

- 13 colors + open
- Separate 6-Color flag for multi-color effects

GOBO WHEEL:

- Metal wheel with 11 GOBOS + open (2 are beam reducers)
- GOBO Shake Effect

PRISM WHEEL:

- 8-facet rotating circular prism
- 16-facet rotating circular prism
- Prism layering

CONTROL:

- 2 DMX channel modes: 16 & 19 channels
- Protocols: DMX-512, RDM, Auto and Primary/ Secondary control modes
- Electronic Dimmer: 0- 100 %
- Variable Strobe: 0-20HZ
- With Wired Digital Communication Network

CONNECTIONS:

- DMX Data In/Out: 3-pin & 5-pin connections
- Power In: Blue Locking indoor power connection
- Power Out: White Locking indoor power connection

PAN/TILT:

- Pan/Tilt: 540-degrees / 270-degrees
- 16-bit Fine Pan

FULL COLOR LCD DISPLAY

ELECTRICAL:

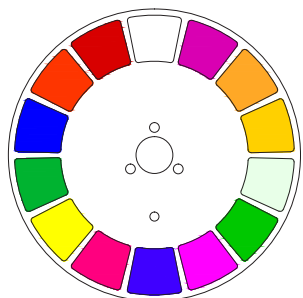

- Multi-voltage operation: AC 100-24V, 50/60Hz
- Maximum Power Consumption: 150W
- Power daisy chain: 2 units @120V, 3 units @230V

DIMENSIONS/WEIGHT:

- Dimensions (LxWxH): 7.875" x 11.875" x 18.3125" / 200x302x465mm
- Weight: 29 lbs. / 12.8 kg

WHAT'S INCLUDED:

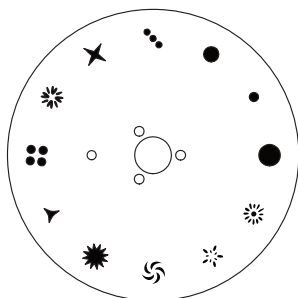

- Locking power cord
- Omega bracket
